MEERUT INSTITUTE OF ENGINEERING AND TECHNOLOGY, MEERUT**

## **DECLARATION**

We hereby declare that the project entitled -“BOOK MY BUS”, which is being submitted as Mini Project in department of Computer Science & Engineering (Artificial Intelligence & Machine Learning) to Meerut Institute of Engineering & Technology, Meerut (U.P.) is an authentic record of our genuine work done under the guidance of “AJAY SHAH”, Prof./ Assoc. Prof./ Asst. Prof. of Computer Science & Engineering (Artificial Intelligence & Machine Learning), Meerut Institute of Engineering and Technology, Meerut.

Date: 30/12/22

Name of students

HARSH KAUSHIK  
VINAYAK CHAUHAN

Place:

MEERUT INSTITUTE OF ENGINEERING AND TECHNOLOGY  
MEERUT

## **CERTIFICATE**

This is to certify that mini project report entitled – “BOOK MY BUS” submitted by “HARSH KAUSHIK AND VINAYAK CHAUHAN” has been carried out under the guidance of “AJAY SHA”, .Asst. Prof. of Computer Science & Engineering (Artificial Intelligence & Machine Learning), Meerut Institute of Engineering and Technology, Meerut.

This project report is approved for Mini Project (KCS 354) in 3<sup>rd</sup> semester in Computer Science & Engineering (Artificial Intelligence & Machine Learning) from Meerut Institute of Engineering and Technology, Meerut.

**Internal Examiner**

**Date: 30/12/22**

## **ACKNOWLEDGEMENT**

I express my sincere indebtedness towards our guide “AJAY SHAH”, Prof./ Assoc. Prof./ Asst. Prof. of Computer Science & Engineering (Artificial Intelligence & Machine Learning), Meerut Institute of Engineering and Technology, Meerut for his valuable suggestion, guidance and supervision throughout the work. Without his kind patronage and guidance the project would not have taken shape. I would also like to express my gratitude and sincere regards for his kind approval of the project, time to time counseling and advises.

I would also like to thank to our HoD Dr. Rambir Singh, Department of Computer Science & engineering (Artificial Intelligence & Machine Learning), Meerut Institute of Engineering and Technology, Meerut for his expert advice and counseling from time to time.

I owe sincere thanks to all the faculty members in the department of Computer Science & engineering (Artificial Intelligence & Machine Learning) for their kind guidance and encouragement time to time.

Date: 30/12/22

Student name :

HARSH KAUSHIK  
VINAYAK CHAUHAN

## **INTRODUCTION**

Unless like in the previous stage people as to walk into travel agency company to buy the tickets and also to check the timings. This problem is overcome introducing Online Ticket Booking System. This project will provide an option to customers to book the tickets online and to check the confirmation online. Using this system customer can book flight tickets, Bus tickets, Train tickets.

The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all it proves it is user-friendly. Online Bus Booking System, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources.

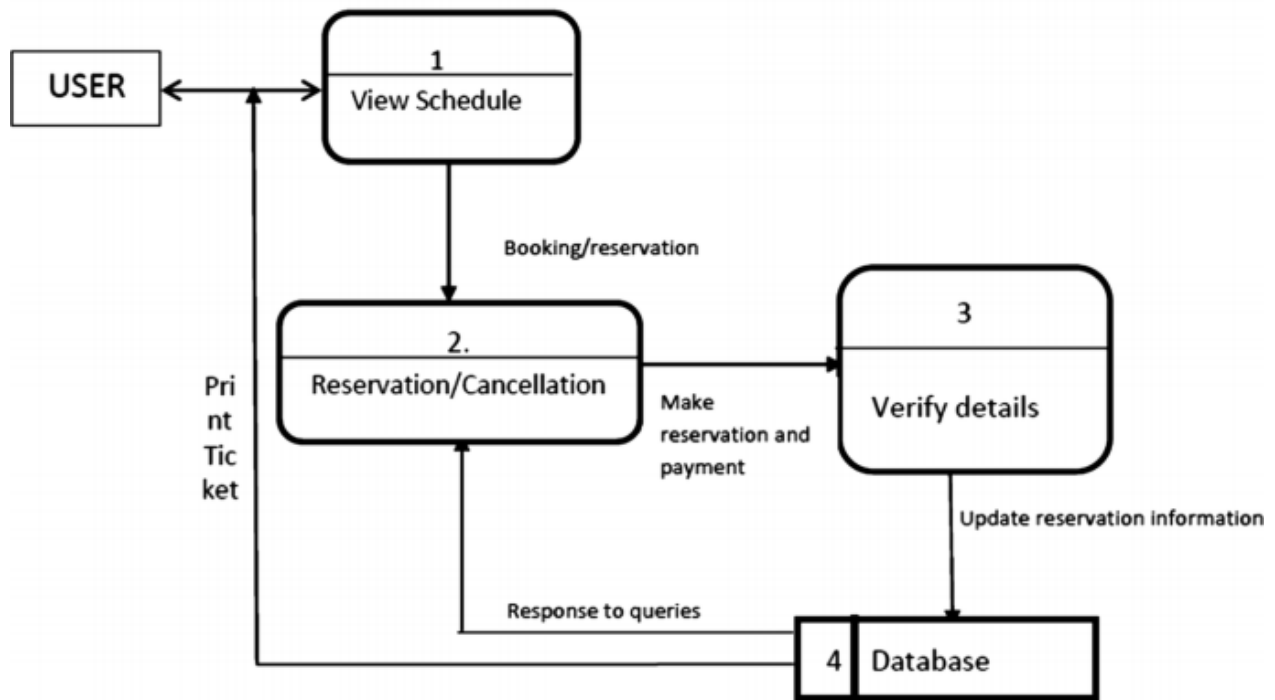

The Bus ticket reservation system is currently maintaining the project Transport Company's process manually which is a very time consuming process. It deals with transport industry's ticket booking and transport maintenance, so it becomes a very tedious job for the ticket booking transporter to look after these particulars to complete the task at right time. The bus ticket booking system not only deals with transporters owned vehicles but also takes into consideration about the other types project of system transport vehicles available with other transporters.

The main objective of the Bus Ticket Booking System is to manage the details of Bus, Ticket, Booking, Agent, Seats. It manages all the information about Bus, Customer, Seats, Bus. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Bus, Ticket, Customer, Booking. It tracks all the details about the Booking, Agent, Seats.

## SYSTEM DESIGN

In this system user searches the location from where he/she have to go and where to go. After Submit user is free to choose bus according to his/her choice.

### FLOW CHART

# **TECHNOLOGY BUCKET**

## **HTML**

HTML is an acronym which stands for **Hyper Text Markup Language** which is used for creating web pages and web applications. Let's see what is meant by Hypertext Markup Language, and Web page.

**Hyper Text:** HyperText simply means "Text within Text." A text has a link within it, is a hypertext. Whenever you click on a link which brings you to a new webpage, you have clicked on a hypertext. HyperText is a way to link two or more web pages (HTML documents) with each other.

**Markup language:** A markup language is a computer language that is used to apply layout and formatting conventions to a text document. Markup language makes text more interactive and dynamic. It can turn text into images, tables, links, etc.

**Web Page:** A web page is a document which is commonly written in HTML and translated by a web browser. A web page can be identified by entering an URL. A Web page can be of the static or dynamic type. **With the help of HTML only, we can create static web pages.**

## **CSS**

CSS stands for Cascading Style Sheets. It is a style sheet language which is used to describe the look and formatting of a document written in markup language. It provides an additional feature to HTML. It is generally used with HTML to change the style of web pages and user interfaces. It can also be used with any kind of XML documents including plain XML, SVG and XUL.

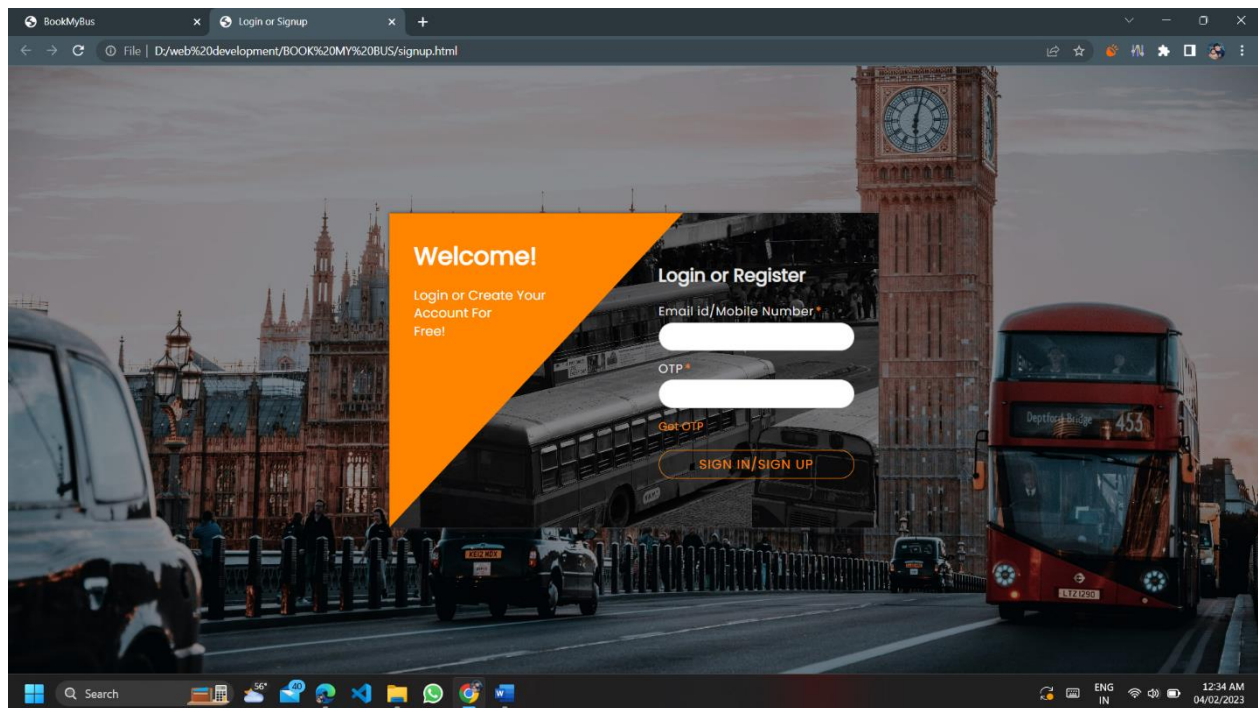

CSS is used along with HTML and JavaScript in most websites to create user interfaces for web applications and user interfaces for many mobile applications.

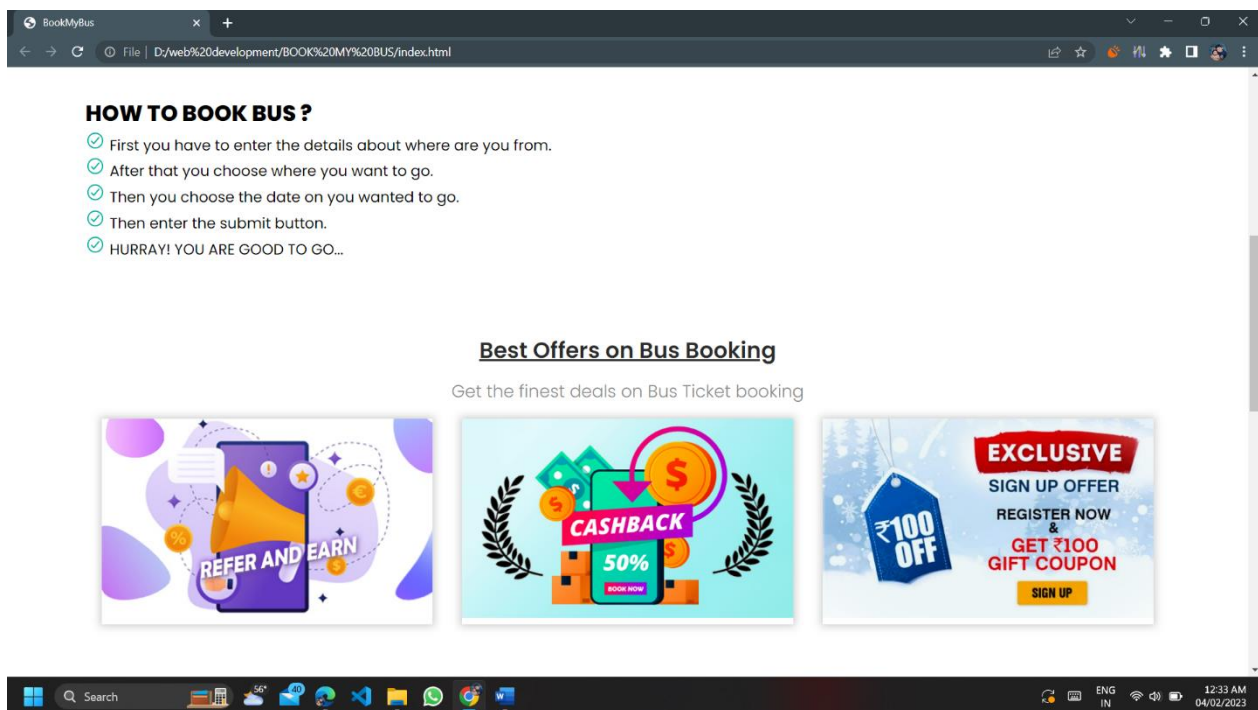

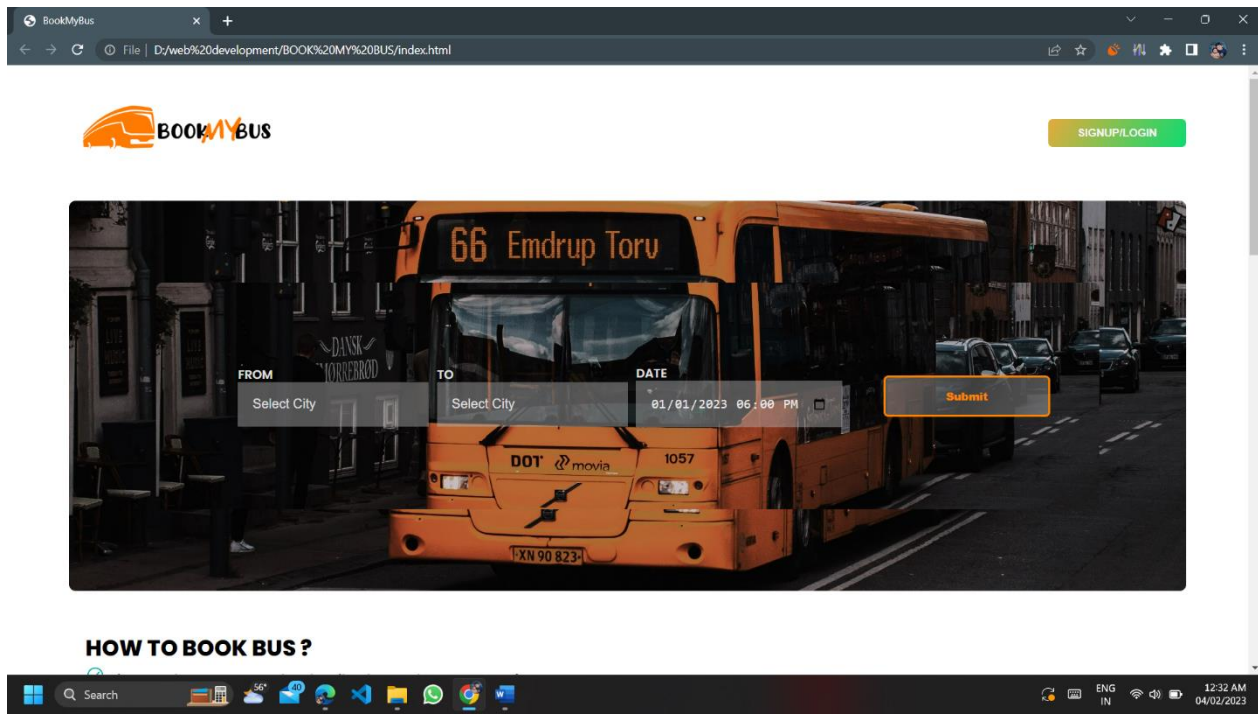

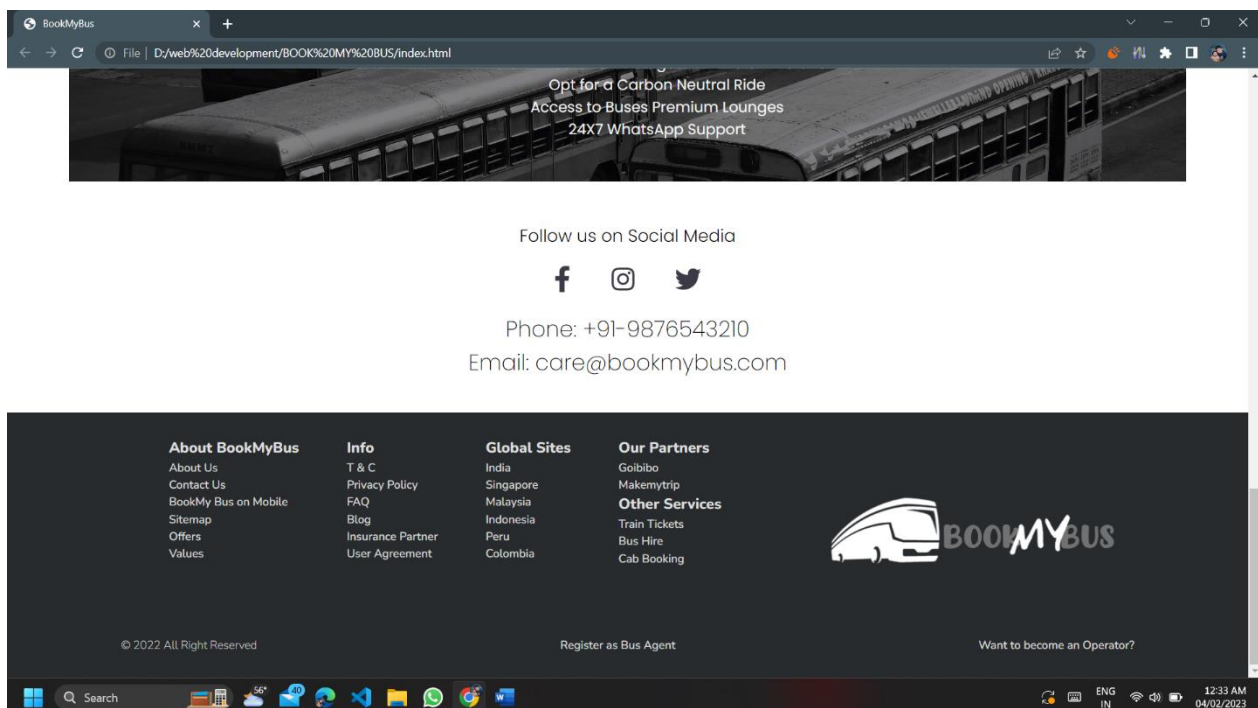

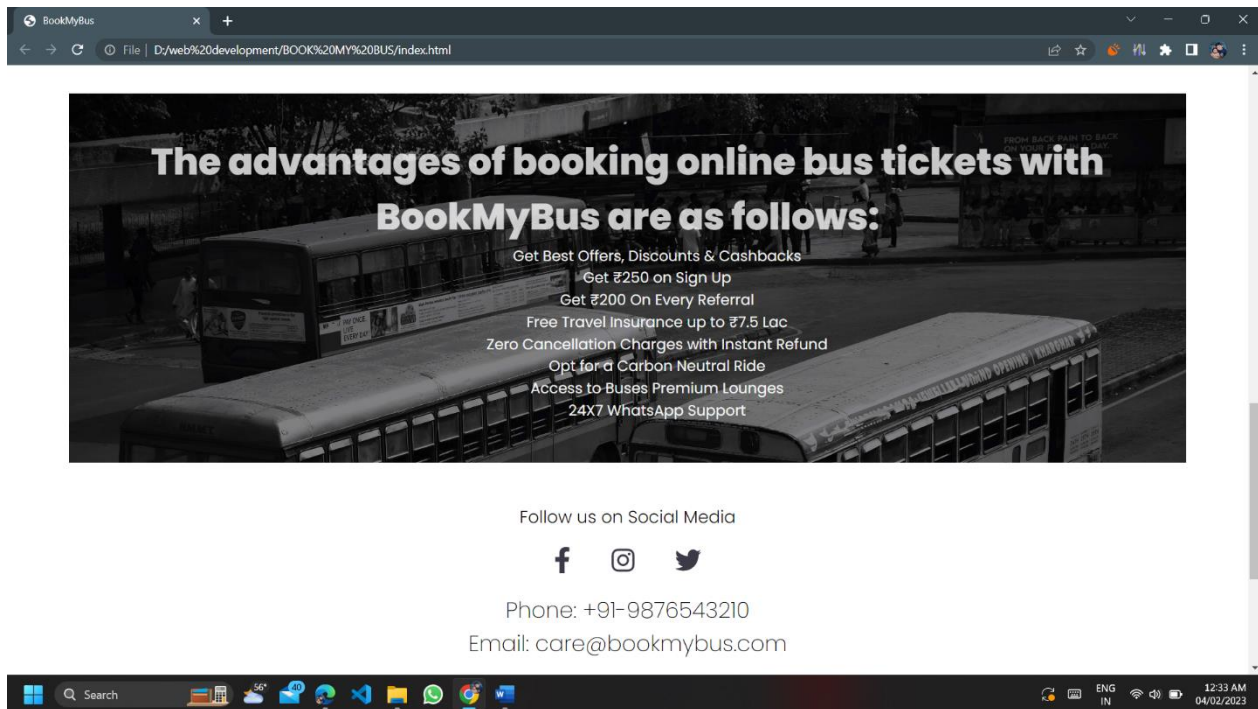

Cascading Style Sheet (CSS) is used to set the style in web pages that contain HTML elements. It sets the background color, font-size, font-family, color etc property of elements on a web page. There are three types of CSS which are given below:

- Inline CSS
- Internal or Embedded CSS
- External CSS
